Specifications

Faster output, faster delivery

- Maximum printing speed of 30 feet per minute
- High-capacity 256MB RAM and HDD 160GB to support large file

High-resolution label printing

- Resolution: 600 x 1200 dpi or 600 x 600 dpi
- Toner Based System

Prompt and convenient data processing

- Prints maximum 1.2m-long labels
- Anycomm software reduces media waste
- Fine tune color selection with proprietary RIP software
- Sensor for black mark and printing on pre-cut labels

Effective and economical printing work

- Various materials and thicknesses can be supported (Papers, PP and PET, BOPP plus much more!
- Capacity of toner cartridge: (5% coverage of A4 sized paper) K - 11,000 pages / CMY - 11,500 pages

Interface and software

- Interface : High-speed USB, TCP/IP
- OS "Windows XP, Vista, Windows 2003, 7, 8, 10
- S/W : Compose Rip S/W, Wasatch Rip S/W, Windows driver

General Characteristics

- Unwinder system / Rewinder system (option)
- Maximum diameter of installed media rolls : 14.5 inches (370mm)
- Diameter of the core inside : 3 inches (7.62 cm)
- Automatic or manual cutting after printing
- Operating environment : Temperature 50-90 degrees F° Humidity 20-80%Power supply : 220~240VAC, 50~60Hz, 4.5A
- Power consumption : usual 600W, Maximum 1,300 W
- Weight : 210 lbs. (95Kg)
- Dimension : 46.5"(L) X 19"(W) X 24"(H)

any-rewinder

Max roll width / weight	• 8.5 inches (215mm) / 10Kg
Max roll diameter	• 11.8inches (300mm)
Rewinding speed	• Max 30 ft/min (same as printing speed)
Function	• Normal rotation mode • Reverse rotation mode • Counter function
Power	• 220 V ~ 240V
Dimension	• Net size : 19.5"(L) X 22"(W) X 18"(H) mm / 57.5 lbs. (26 kg)
Reference	• Compatible with any-002 only

4-Color Digital Label Press

GHS COMPLIANT BS5609

Arrow Systems Inc.

The Globally Harmonized System of Classification and Labeling of Chemicals

any-002

4-Color Digital Label Press

Print up to 5,000 full color labels per hour!

With printing speeds of up to 30 ft (9m) per minute, you can easily print up to 5,000 labels per hour* !

*4x4, 2-up design

No need for professional technicians

No professional technicians are necessary. The system's operation is simple and straight forward. With one day's training, anyone can easily become a label printing pro!

Desktop design for minimal system footprint

The compact, desktop design is perfect for small offices or areas with limited floor space. The ANY-002 was designed with maximum efficiency in mind.

Maximum media versatility

The ANY-002's low temperature fuser allows or printing with even the most delicate materials. Papers, PET, PP, BOPP, and unique materials are no problem for the ANY-002.

User-friendly media loading design

The loading design of the ANY-002 was made to be quick, easy, and hassle free.The automatic media guide and feeding system allows media to effortlessly flow forward in perfect alignment for a flawless, consistent image, every time.

Print any label, any time, on Demand.

Once an order is received, continuous or pre-cut labels can be immediately printed in desired quantities. This minimizes unnecessary inventory costs and facilitates customer satisfaction through fast lead times.

Make the impossible a reality!

What was impossible with analog equipment is a breeze with the digital ANY-002. Using some of the most advanced RIP software available, the ANY-002 can power through the most technologically demanding jobs. Print variable data such as UPC's, SKU's, Lot #'s etc. all with the push of a button!

Print on pre-cut label stock - no die cutting needed!

The ANY-002 comes complete with a multi-purpose sensor that is able to detect black marks, label gaps, & allows for back sided printing! Eliminate die-cutting from your production by printing on pre-cut labels!

Bigger rolls, longer runs!

The high capacity un-winder is designed for extra-large rolls up to 14.5 inches in diameter, allowing for runs up to 1500ft long without interruption. This means less down time and more production.

Reduce waste with advanced software

Dramatically reduce waste with short run digital printing compared to analog and flexographic printing. With only a few feet of material required for setup, material waste will become a thing of the past!

GHS & BS-5609 Certified System

BS-5609 certification is among the most stringent label durability certifications available, which includes a 90-day saltwater submersion test. Section 2 compliant labels printed on the ANY-002 pass with flying colors!

Extremely High Label Durability

Labels printed on the ANY-002 have excellent resistance to Chemical, Water, UV Fade, Abrasion, Moisture, and Environmental conditions! Up to 1-year label durability without lamination when printed on select synthetic media!

Tight media tolerances

The robust web station makes thin, flexible label media advance straight and in perfect alignment.

Automatic cutter and media feeding system

Media cutting and feeding automatically begin after label printing.

Multi-purpose gap and black mark sensor

Complete with a multi-purpose sensor that is able to detect black marks, label gaps, & back sided printing!

High Capacity Un-winder

Extra-large un-winder supports media up to 11.8 inches outer diameter for runs up to 1500 ft long without interruption

Color laser print engine with LED technology

Advanced electro-photography LEDs provide smaller laser spot size and exceptional image quality

Counter system

Senses black marks, accurately counting each label that passes under the sensor

High Capacity Re-winder

Extra-large re-winder supports media up to 11.8 inches outer diameter
